C.S.F. INOX SPA

PREFACE AND WARNING

This publication does not constitute a contract proposal or an offer to the public or product advertisement.

This publication is reserved to the internal operators of C.S.F. INOX.

Any kind of product sale and marketing can occur only according to the general terms of contract and special conditions listed by C.S.F. INOX as per contract forms.

All the instructions, data and representations (in whatever way executed) listed in this publication are indicative and do not binding.

C.S.F. does not stand surety or undertake any obligation for the utilisation of this document and for the information contained. In particular, it does not guarantee against omissions or errors of the data and drawings here indicated.

Notice that the technical specifications, information and representations in this document are merely indicative and approximate.

C.S.F. INOX reserves the right at any moment and without notice to modify the data, drawings and information indicated in this document.

C.S.F. INOX recommends anyone to verify with the C.S.F. INOX operators contractual conditions and the product characteristics as per the official documents attached to all products in the C.S.F. INOX range.

All the general and non-binding technical specifications and representations may not correspond to the real conditions of the products and to their operating modes for each different application.

C.S.F. INOX guarantees its own products according to the general guarantee conditions in compliance with the required modes of utilisations as per separate documents, regardless of what is indicated in this document, if the assembly and operating methods of the products are observed.

Only the instructions indicated in the contract documents, if duly undersigned by authorised C.S.F. INOX personnel, are binding for C.S.F. INOX.

We remind our technical and business collaborators to show the customer our range of products indicating the technical specifications of each type, with the conditions of utilisation and the actual utilisation methods.

Please consider this warning carefully because C.S.F. INOX shall not be liable for any utilisation of this document, of the data and representations here indicated.

CENTRIFUGAL PUMPS

CN SERIES

Standard design

Closed coupled single-stage centrifugal pumps. A range of 3 models with open impellers, independent shafts and IEC standard motors.

Optimised design to ensure high levels of hygiene - The absence of product hold-up and no dead-legs ensures efficient cleaning by standard CIP methods and effective sterilisation by SIP.

Wetted parts are in forged polished plate and investment cast electropolished CF3M 1.4409 / AISI 316L (1.4404) stainless steel.

Centrifugal pumps with special finishes to 0,8 micron Ra, tested and approved to US 3A standards.

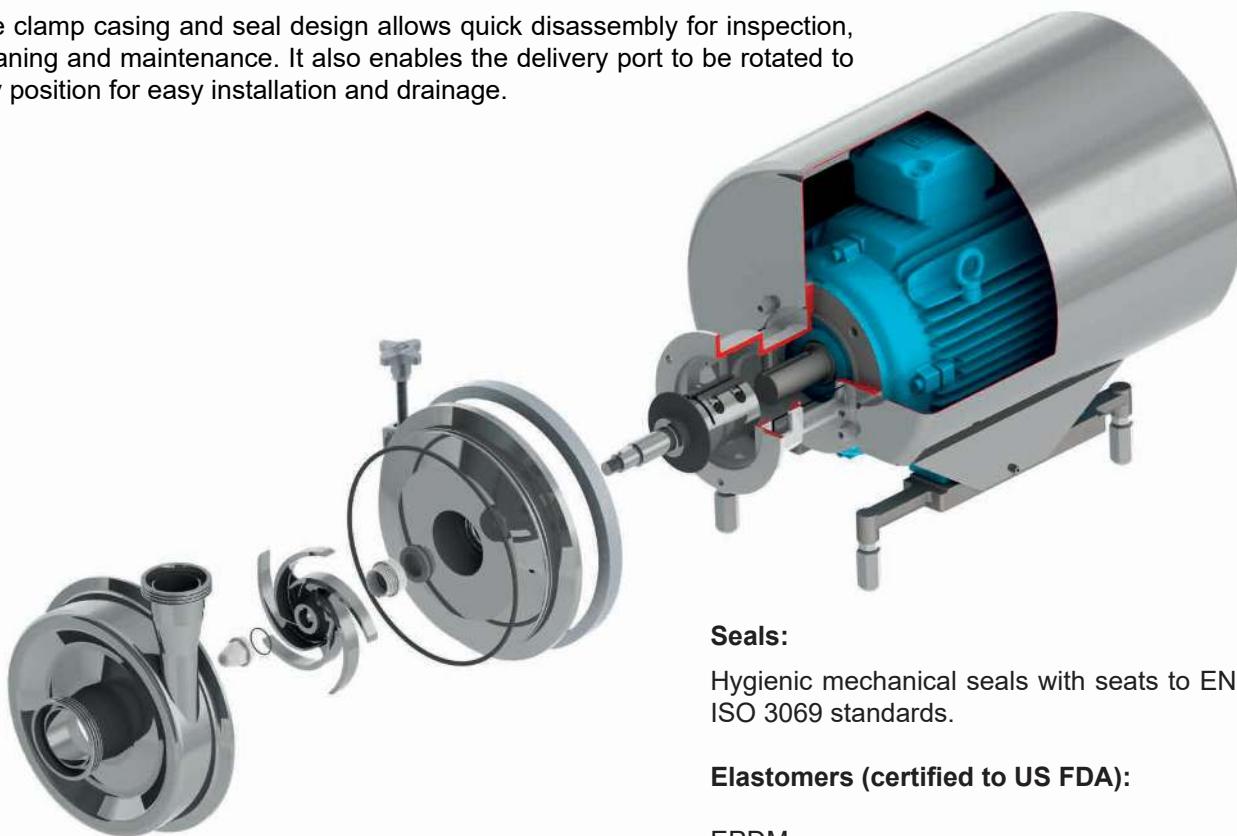

Investment cast and electro-chemical polishing. Internal finishes of 0,5 micron Ra are available on request.

Flow rates up to 75 m³/h, heads of more than 60 m.

Maximum inlet pressure: 4 bar.

Temperature range: -10°C to 120°C.

The clamp casing and seal design allows quick disassembly for inspection, cleaning and maintenance. It also enables the delivery port to be rotated to any position for easy installation and drainage.

Seals:

Hygienic mechanical seals with seats to EN 12756, ISO 3069 standards.

Elastomers (certified to US FDA):

EPDM
Fluorocarbon
Silicone
P.T.F.E. (FEP)

Connections:

DIN - SMS - IDF - BS / RJT - DS - CLAMP and EN 1092-1 PN16 flanges and on request available for other international standards.

Applications

Rev. 05 Food processing, dairy, beverage, chemical, cosmetics and pharmaceutical industries. The open impeller allows a large range of products such as purified water, juices, creams, ice-cream mix, milk, wine, spirits, whey and WFI to be safely transferred.

ISSUE DATE: June 25, 1993

CERTIFICATE AUTHORIZATION NUMBER: 739

THIS IS TO CERTIFY THAT

CSF INOX SPA

Strada per Bibbiano 7, 42027 Montecchio , Italy

is hereby authorized to continue to apply the

3-A Symbol to the models of equipment, conforming to 3-A Sanitary Standards for:

Number 02-11 (Centrifugal and Positive Rotary Pumps)

set forth below:

CIP Models: Centrifugal pumps CN1, CN2, and CN3, with type TH mechanical seal; CSA, all sizes, with type Y, T, and U mechanical seals; CSAD, all sizes, with type U mechanical seals; ASH, all sizes, with type TH mechanical seals.
Two Screw pumps TS65, TS80 with dual balanced mechanical seals

VALID THROUGH: December 31, 2019

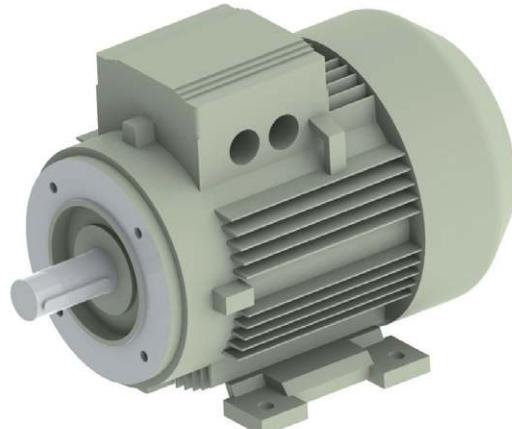

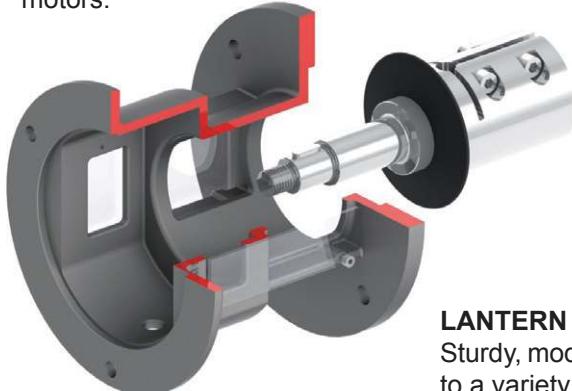

Timothy R. Rugh
Executive Director
3-A Sanitary Standards, Inc.

The issuance of this authorization for the use of the 3-A Symbol is based upon the voluntary certification, by the applicant for it, that the equipment listed above complies fully with the 3-A Sanitary Standard(s) designated. Legal responsibility for compliance is solely that of the holder of this Certificate of Authorization, and 3-A Sanitary Standards, Inc. does not warrant that the holder of an authorization at all times complies with the provisions of the said 3-A Sanitary Standards. This in no way affects the responsibility of 3-A Sanitary Standards, Inc. to take appropriate action in such cases in which evidence of nonconformance has been established.

NEXT TPV INSPECTION/REPORT DUE: September 2021

SHAFT

Independent shaft for compression coupling to IEC standard motors.

LANTERN BRACKET

Sturdy, modular design for flange mounting to a variety of different motors.

REAR CASING COVER

Investment cast and precision machined in a wide variety of different executions according to the application and duty requirements.

IMPELLER

The open, reverse blade impeller is manufactured in high grade materials. The optimised profile, delivers the perfect combination of high efficiency and safe product handling. Thanks to the dynamic balancing method and investment cast impeller design, reliability is a key benefit.

PUMP CASING

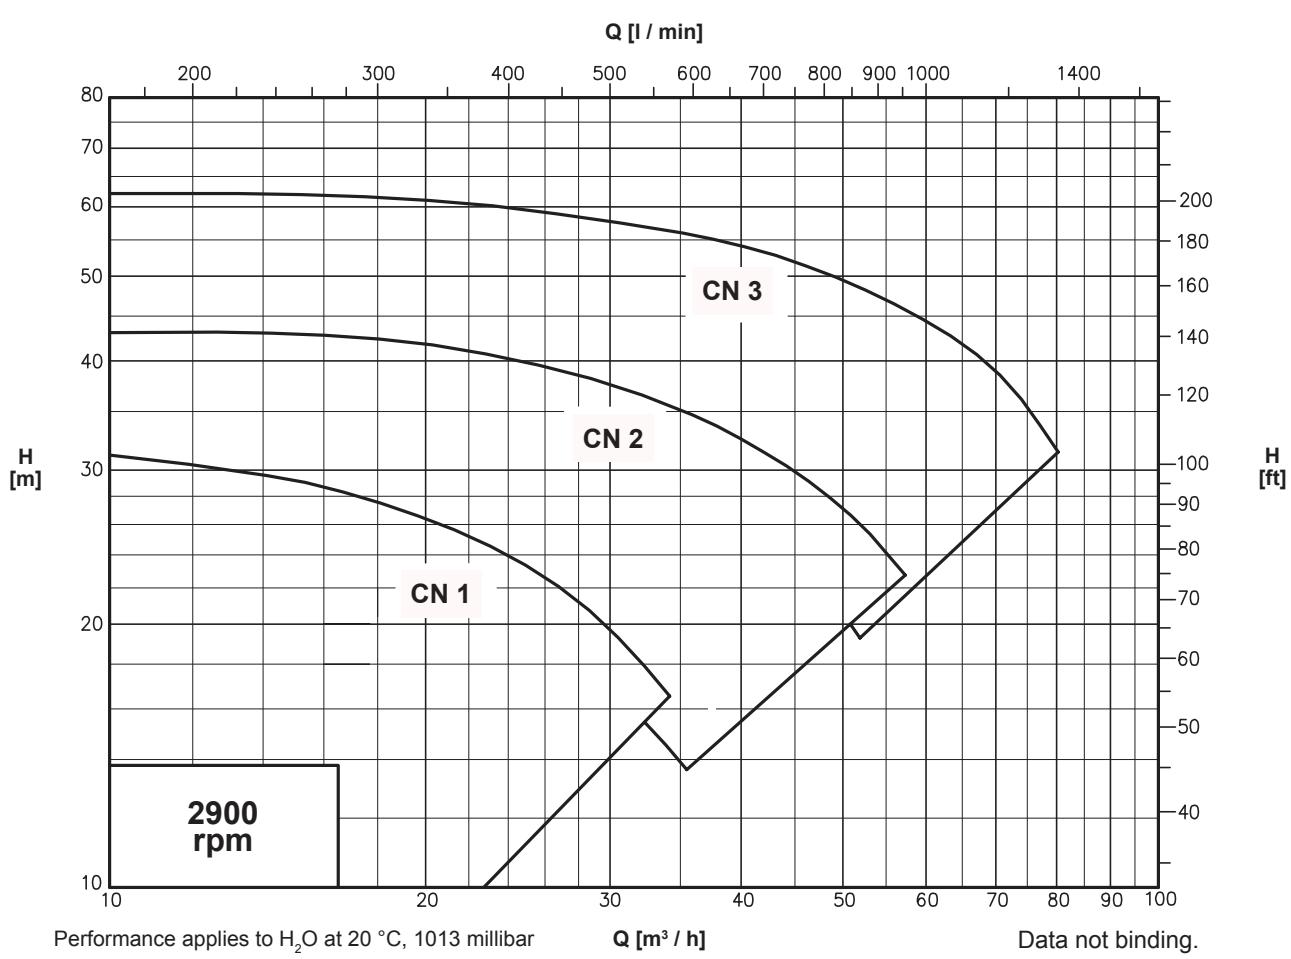

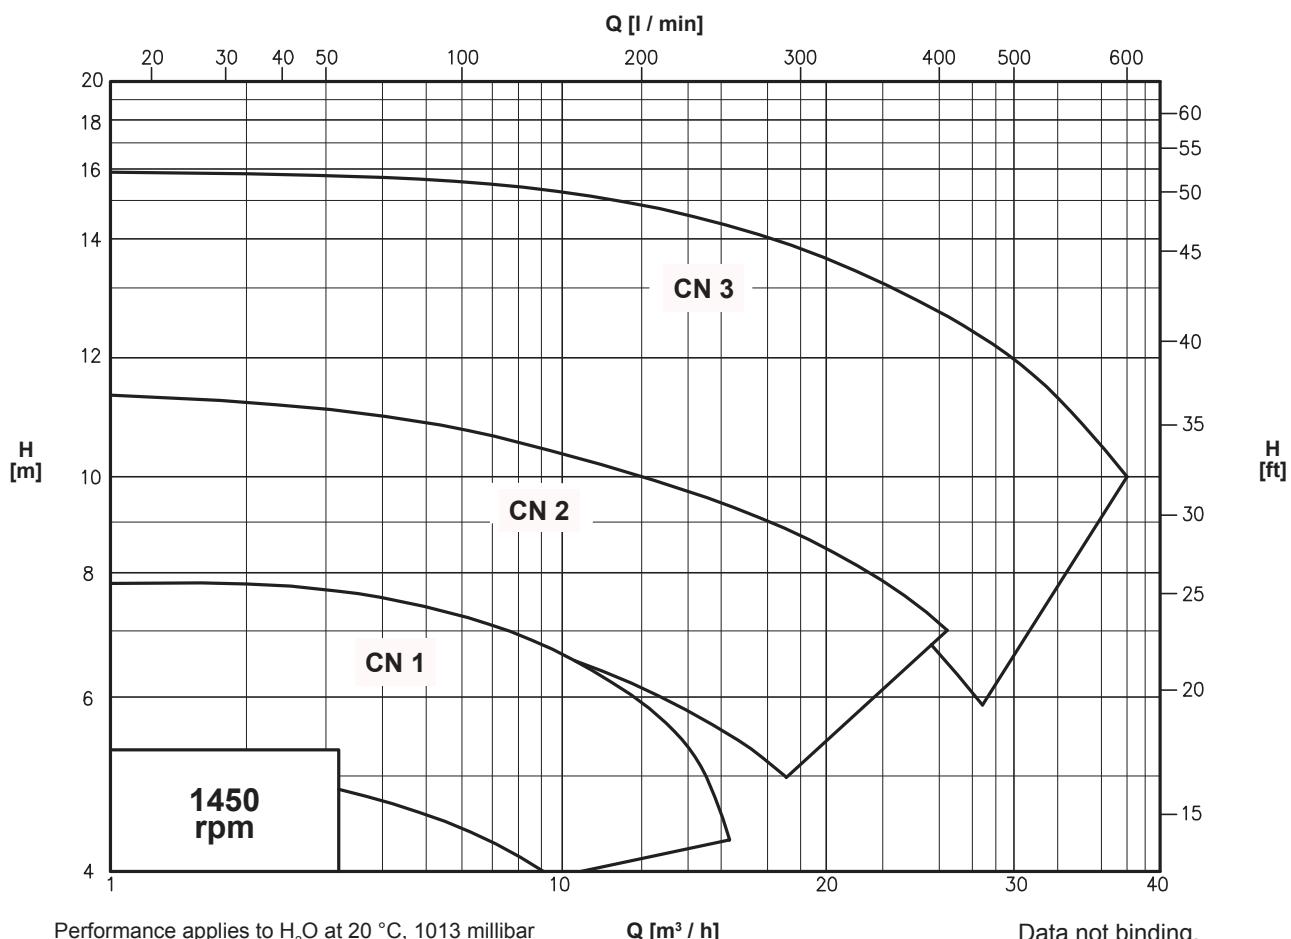

The press-forged casing, with its enhanced hydraulic design delivers high performance, low noise and most importantly excellent hygiene for fast and effective cleaning. The clamp fixing allows the discharge port to be positioned to suit virtually any installation position.

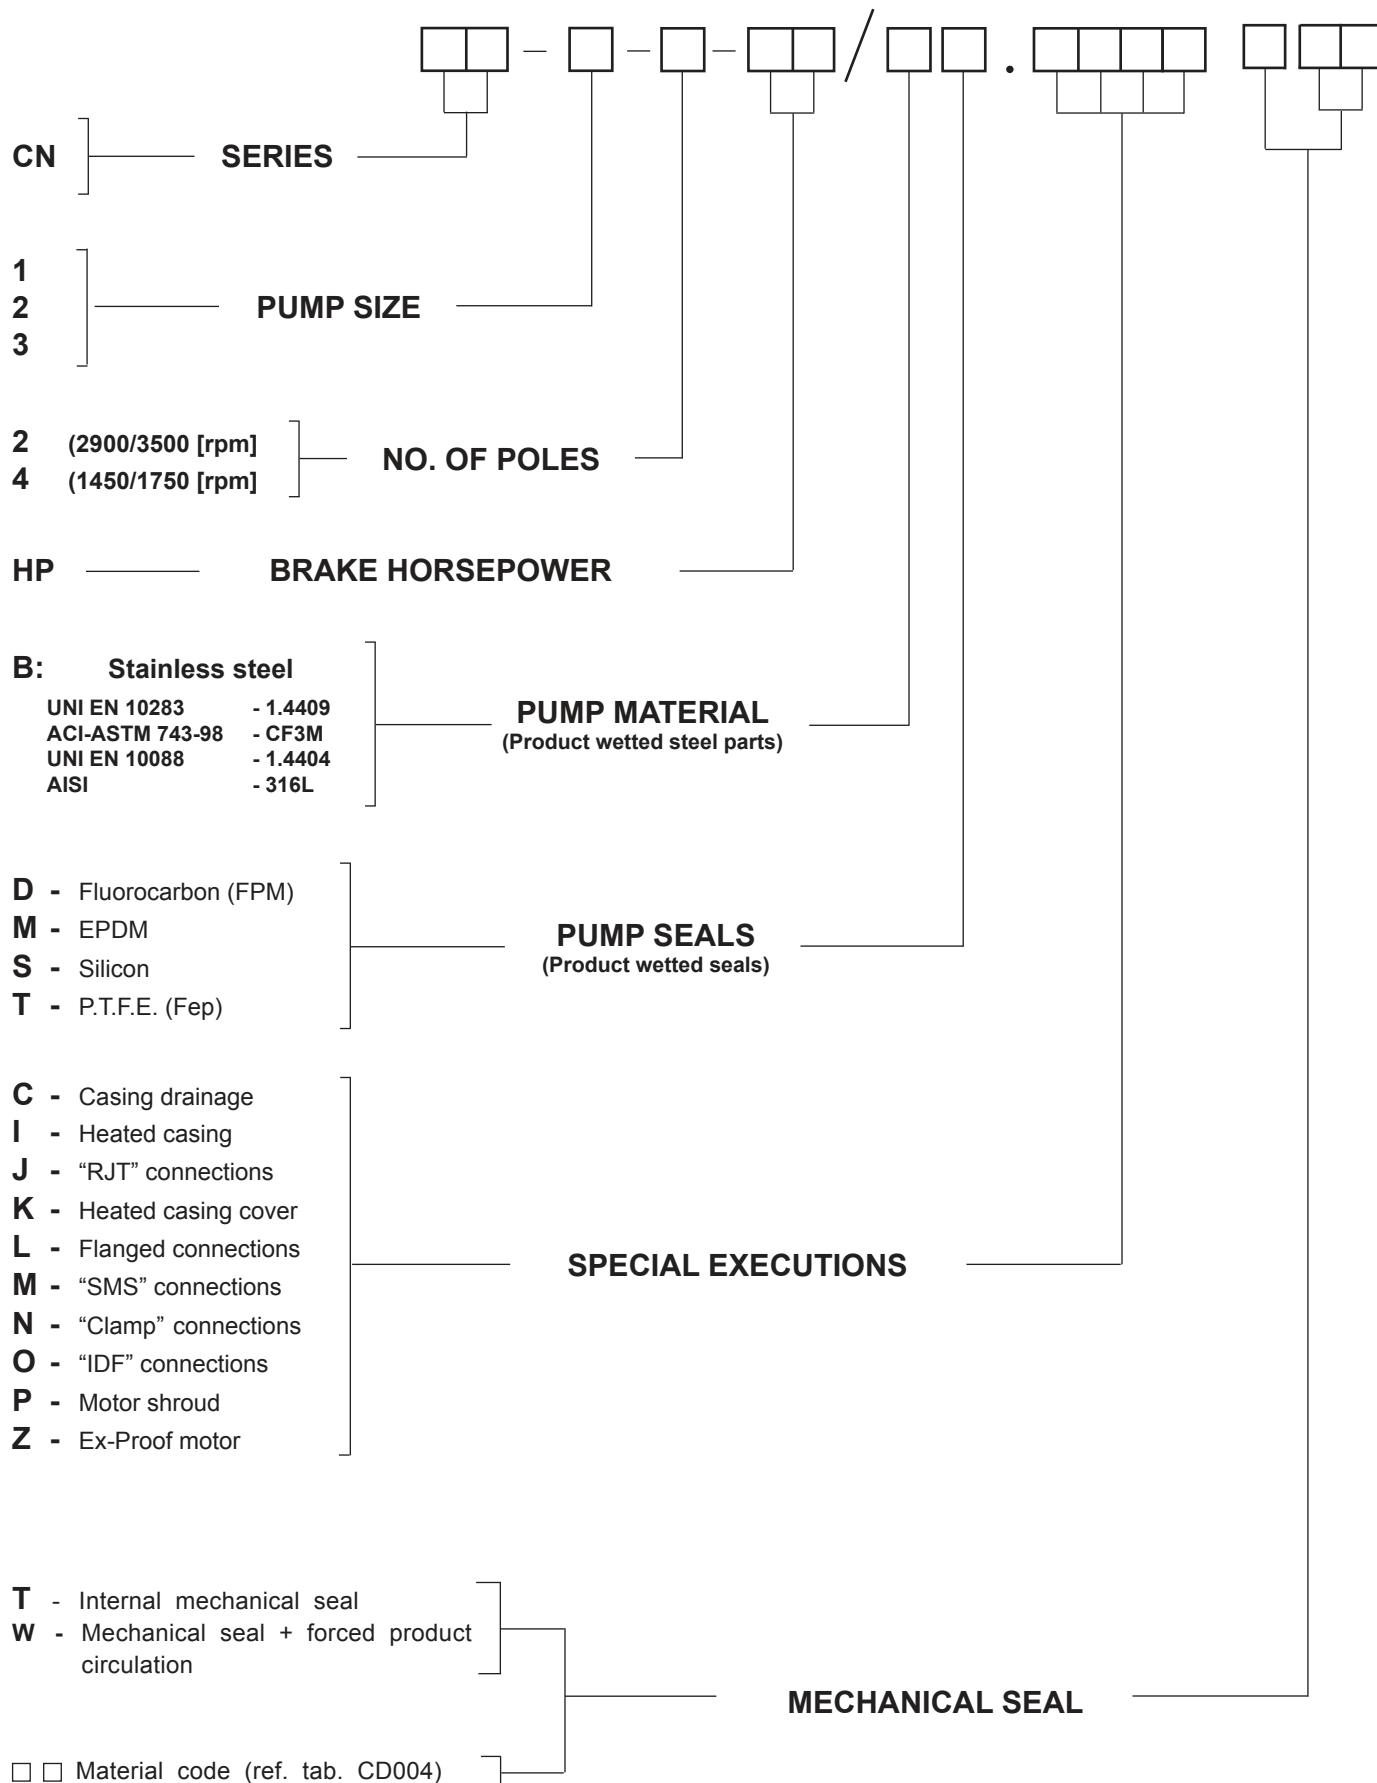

SEPARATE MOTOR

A choice of industry standard electric motors to the following international norms:

- IEC 34 - 1
- IEC 72
- EN 60034

GENERAL DIAGRAMS CN

Example: **CN 3-2-20/BM.PTH1**

MECHANICAL SEALS

MATERIAL CODES

METALS

H - Nickel-plated stainless steel AISI 304
X - Stainless steel AISI 316L

CARBONS

V - Normal carbon
Z - Special carbon

RESINS

5 - Normal PTFE
4 - Loaded PTFE
F - O-Ring FEP

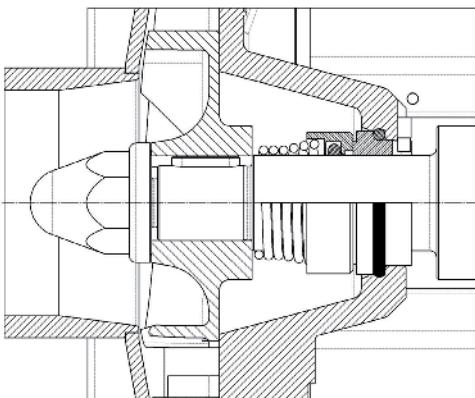

METAL OXIDES
2 - Alumina ceramic

METAL CARBONS

3 - Hard metal welded on stainless steel (TUC)
R - Integral anti-corrosion hard metal (TUC)
K - Integral silicate carbon (SIC)

ELASTOMERS

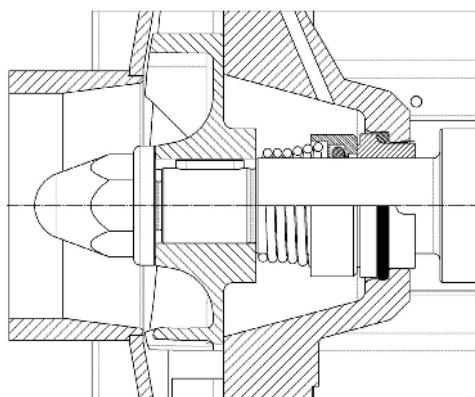

6 - Nitrile (NBR)
7 - Ethylene propylene (EPDM)
W - FPM for high T
Y - Fluorocarbon (FPM)
B - Silicone
Q - Chemraz
U - Kalrez

EXECUTION T

INTERNAL MECHANICAL SEAL

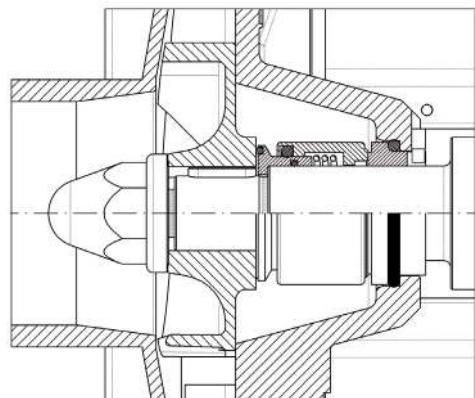

The rotary mechanical seal is internally mounted to ensure effective lubrication, cooling and consequently minimised wear. The seal type, face materials and elastomers are chosen from a range of several options, to suit the nature of the product being handled and the specific application requirements.

EXECUTION W

MECHANICAL SEAL WITH "W" CIRCULATION

This internally mounted mechanical seal has a forced re-circulation of pumped liquid. This feature is beneficial for some applications and products; it improves face lubrication and helps to restrict a rise in temperature, reduces product residues or deposits and eliminates gas bubbles local to the seal.

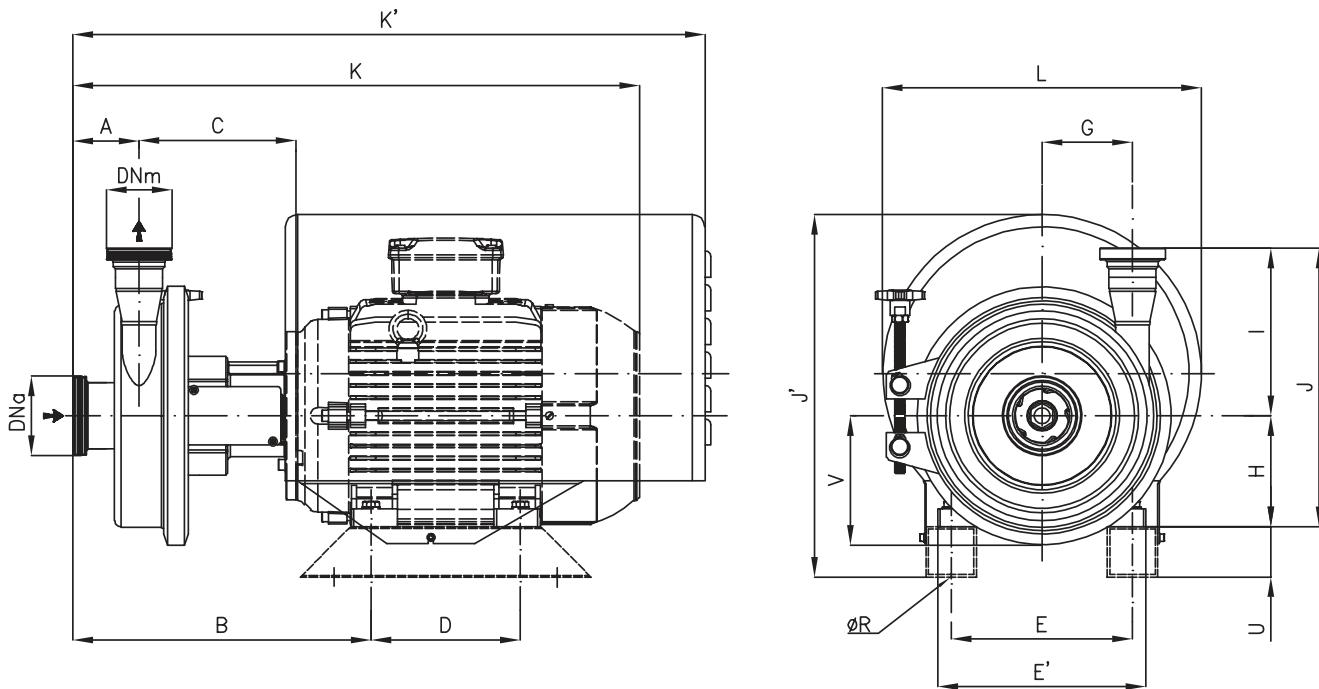

EXECUTION TH.

INTERNAL MECHANICAL SEAL "H"

Protected spring and hydraulically balanced; especially suited for high cleanliness, vacuum and semi-viscous product applications. Easy to clean with CIP, it is perfect for use with foodstuffs, sanitary products, pharmaceuticals and wherever process sterilisation is a requirement.

CENTRIFUGAL PUMPS

CL - CLC SERIES

Standard design

Closed coupled single-stage centrifugal pumps. Available in a wide range of models with closed or open impellers and 2 or 4 pole motors.

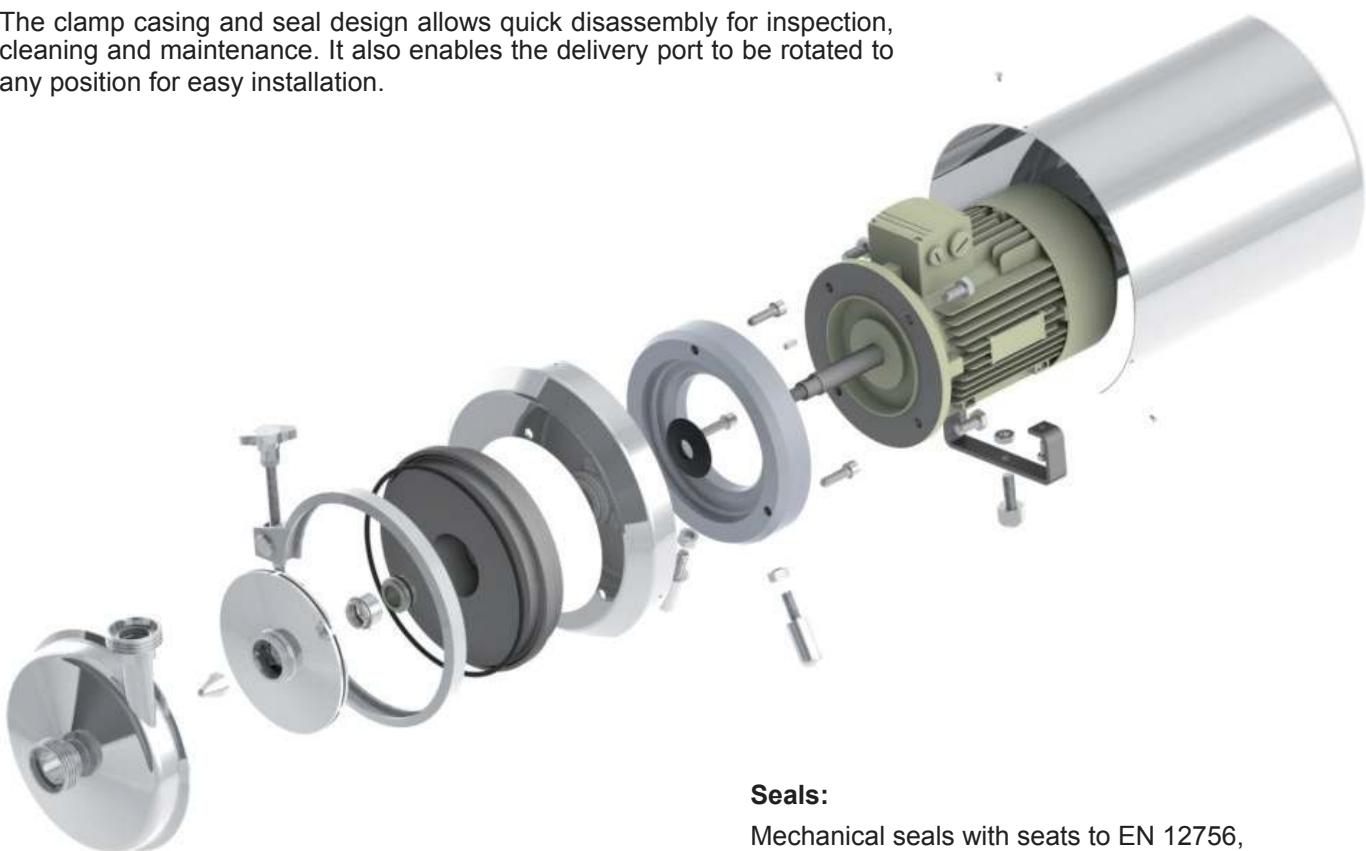

Wetted parts are in forged polished plate and investment cast electropolished CF8M 1.4408 / AISI 316 stainless steel.

Investment cast and electro-chemical polishing. Special internal finishes to 0,5 micron Ra are available on request.

Special motor shaft supporting the impeller.

Flow rates up to 90 m³/h, heads up to max. 50 m. (7 bar).

The clamp casing and seal design allows quick disassembly for inspection, cleaning and maintenance. It also enables the delivery port to be rotated to any position for easy installation.

Seals:

Mechanical seals with seats to EN 12756, ISO 3069 standards.

Single internal mechanical seal

Single external mechanical seal

Double flushed mechanical seal

Elastomers (certified to FDA):

EPDM

Fluorocarbon

Silicone

P.T.F.E. (FEP)

Connections:

DIN - SMS - IDF - BS / RJT - DS - CLAMP and EN 1092-1 PN16 flanges suitable for most international standards.

Applications

Food processing, dairy, beverage, chemical, cosmetics and pharmaceutical industries. With an open impeller, juices, creams, ice-cream mix, milk, wine, spirits and whey, can be safely transferred at low pressure. While with a higher efficiency closed impeller, clean liquids without solids can be pumped at medium-high heads (max. 40-50 m) to feed pasteurizers and coolers, concentrators, filters, CIP systems, etc.

MOTOR FLANGE

Sturdy and modular in order to couple with different motor sizes.

SINGLE-SHAFT MOTOR

Personalised for each pump.

REAR CASING COVER

Achieved by investment casting, structured and machined according to the various mechanical seals and application requirements.

IMPELLER

Each pump model has its own impeller, both open and closed, manufactured with perfect shapes, thickness and materials and balanced thanks to the investment casting procedure. This means that they are perfectly efficient and reliable.

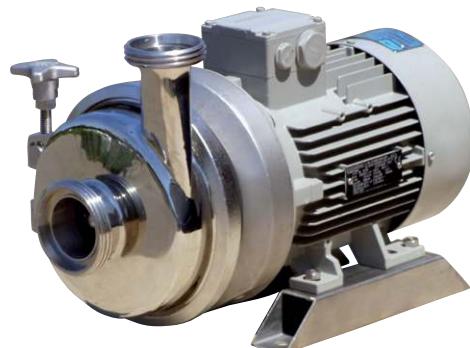

CASING

Press-forged plate circular pump body.

VERSIONS

CL SERIES

Pumps with open impeller with reversed blades, to minimize the shaking of the product. They are therefore especially fitted to transfer creams, ice-creams, milk, wine. The wide ports allow the through flow of muddy products with suspended particles. In polished AISI 316 stainless steel, they have no recessed cavities, which are difficult to reach when cleaning. After having disconnected the inlet and outlet pipes, the front casing can be disassembled by manually loosening the locking clamp.

CL-CLC pump: electric motor with feet supported by stainless steel tubulars.

CL-CLC pump: electric motor with stainless steel shroud and pump supported by 3 or 4 stainless steel feet.

CLC SERIES

Pump with closed impeller with six reversed blades, able to optimize the hydraulic efficiency. They are therefore especially fitted to transfer liquids at medium-high pressures for feeding filters; pasteurizers, coolers, C.I.P. systems. In polished AISI 316 stainless steel, they have no recessed cavities, which are difficult to reach when cleaning. After disconnecting the inlet and outlet pipes, the front casing can be disassembled by manually loosening the locking clamp.

Pumps in industrial version with uncovered motor. The simplified manufacture is offered in the same models of the version with shroud. Speed of 1450 - 1750 - 2850 - 3500 rpm both fix and variable with inverter incorporated.

Open

Closed in 2 pieces

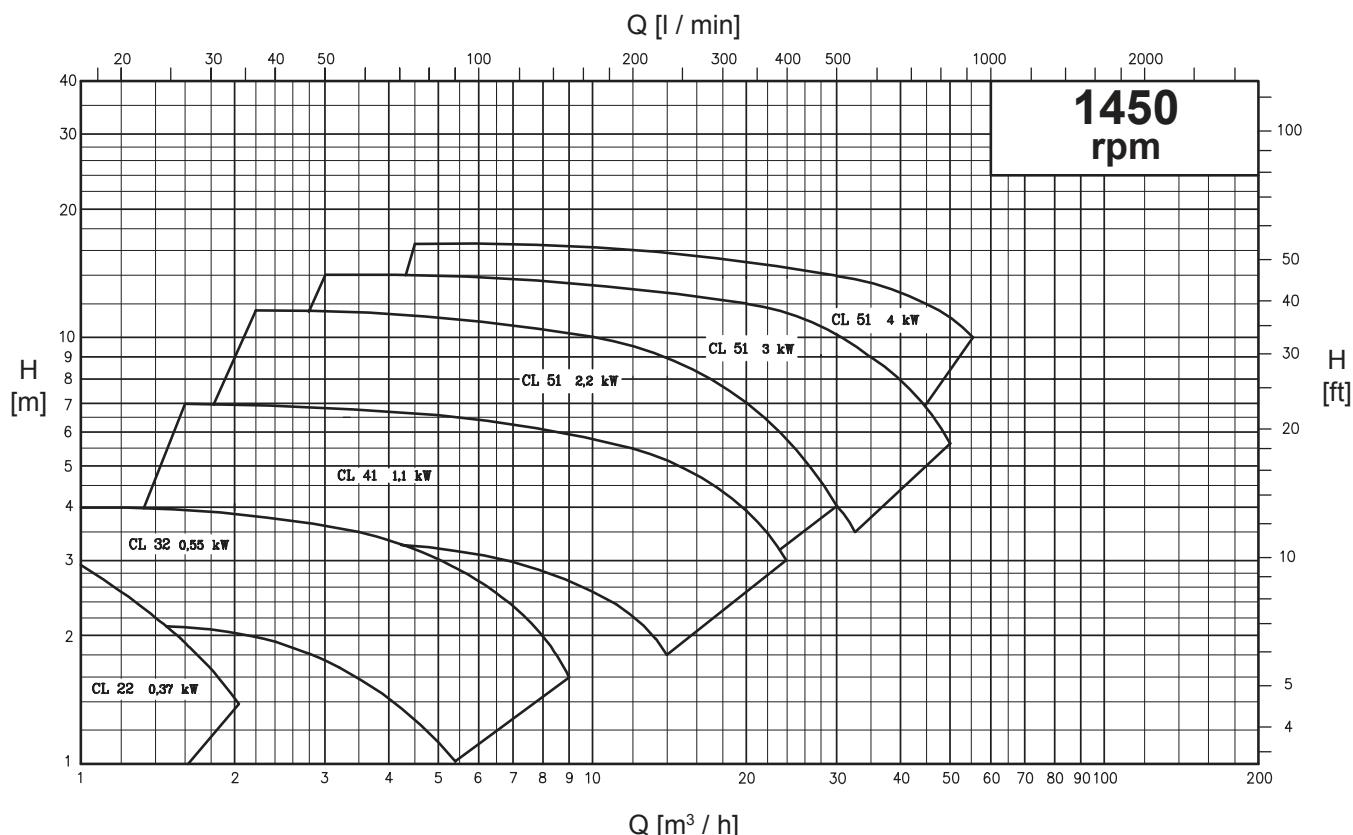

Closed

© All impellers, both closed and open, have reversed blades, designed to optimize the hydraulic efficiency.

MECHANICAL SEALS

CL - CLC pumps are fitted with standard seal seats according to:
EN 12756, ISO 3069.

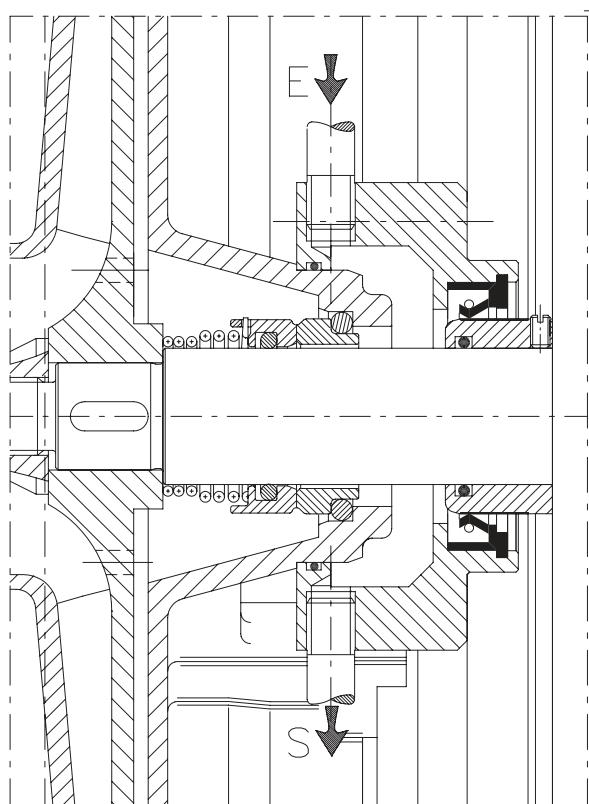

The seal components are available in a wide range of materials, to be selected according to handled product features and the operating conditions.

EXEC. T

Internal mechanical seal

The rotary mechanical seal is internal in order to ensure improved cooling and consequently to reduce its wear. The type of mechanical seal and the materials of the rotating surfaces and of the elastomers are chosen each time, among the several types available, according to the nature of the handled product.

EXEC. V

Flushed internal mechanical seal

The external chamber, by means of the flushing liquid circulation, avoids any damages to the electric motor and contamination of the environment, due to the possible leakages of the internal mechanical seal.

The function of the flushing is to cool, lubricate and clean the seal surfaces.

Radial mech. seal

Mechanical seal

MECHANICAL SEALS

MATERIAL CODES

METALS

H - Nickel-plated stainless steel AISI 304
X - Stainless steel AISI 316L

CARBONS

V - Normal carbon
Z - Special carbon

RESINS

5 - Normal PTFE
4 - Loaded PTFE
F - O-Ring FEP

METAL OXIDES

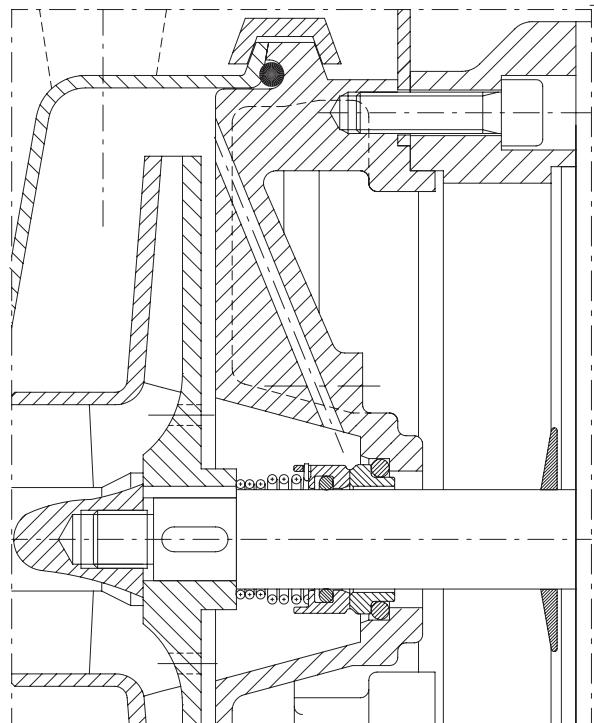

2 - Alumina ceramic

METAL CARBONS

3 - Hard metal welded on stainless steel (TUC)
R - Integral anti-corrosion hard metal (TUC)
K - Integral silicate carbon (SIC)

ELASTOMERS

6 - Nitrile (NBR)
7 - Ethylene propylene (EPDM)
W - FPM for high T
Y - Fluorocarbon (FPM)
B - Silicone
Q - Chemraz
U - Kalrez

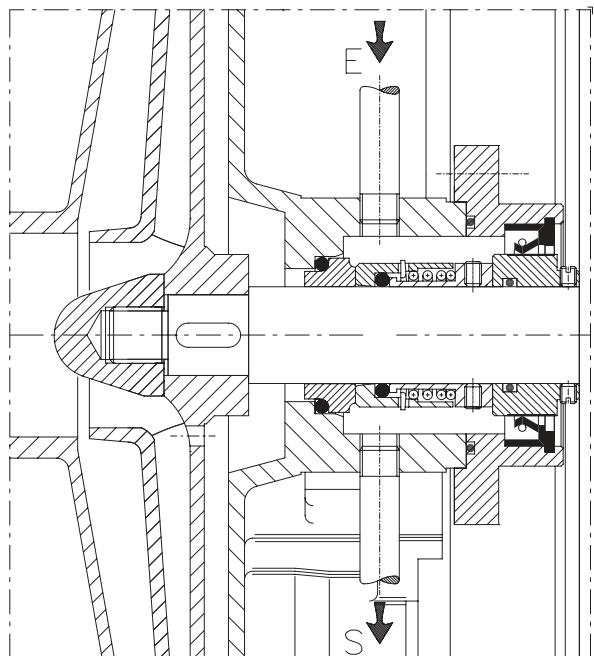

EXEC. W

Internal mechanical seal with liquid circulation

In pumping heated liquid, it induces a forced liquid circulation in the area around the seal, in order to avoid whichever steam formation, which may damage the seal itself.

It removes deposits by limiting sedimentation.

EXEC. U

Double mechanical seal

Double mechanical seal with circulation of the cleaning and cooling liquid.

It is used with products that tend to crystallise, to glue, to harden, to be abrasive, to reach high temperatures and whenever the seal life is limited.

The function of the fluxing is to clean, lubricate and cool the seal; the circulating liquid must be clean.

If the seal is leaking the fluxing liquid will point out this fault.

Mechanical seal

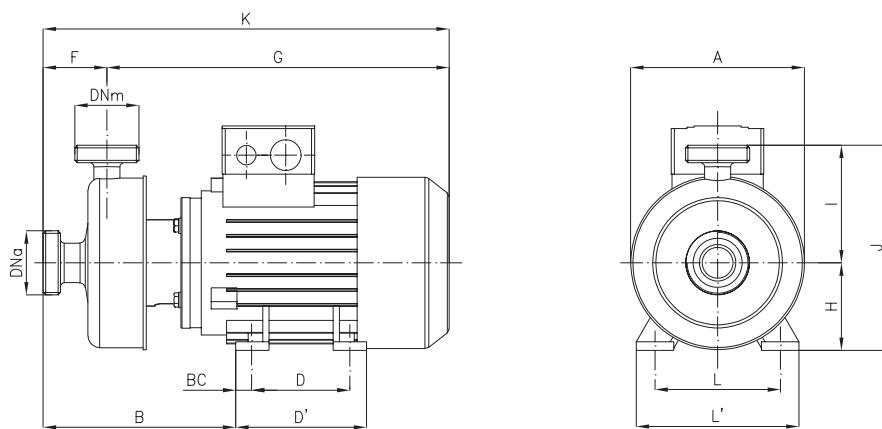

Radial mech. seal

TIPO Type	N° di pale n° of vanes	Pass. sferico max. sphere	Ø max max. diameter	Ø min min. diameter	Bocche tipo Ports type	Bocca aspir. Suction port	DN 65	
APERTA	3	24 mm	150 mm	mm	DIN 11851	Bocca mand. Discharge port	DN 50	

CARATTERISTICHE DI FUNZIONAMENTO CON ACQUA PULITA A 20°C - PESO SPECIFICO 1 (kg/dm³)

Curves show performance with clear water at 70°F - Specific gravity 1 (kg/dm³)
